

DOME-TO-DOME DEBATE CITY CRACKS AND SPACES-IN-BETWEEN

DEC 4 – 2015
KL. 16.30

WHAT IS THE POTENTIAL OF THE CITY CRACKS AND IN-BETWEEN SPACES IN NORDIC CITIES?

That will be the question, when we connect the two domes for the very first time in a public live dome-to-dome debate in order to create an experimental dialogue for audiences in both Denmark and Sweden.

Together we wish to explore ideas and inspire new initiatives - and to experiment with proximity despite physical distances. The potential of the city cracks and in-between spaces in the city has been one of the fundamental approaches in Dome of Visions, as we initiated the project in 2012.

Each Dome invites a panel of artists, entrepreneurs, urban activists, architects and cultural makers to engage in an explorative discussion.

More information and full program will soon be available at domeofvisions.dk/event/dome-to-dome-debate/
